

The SC-BH-XX barometric bypass damper is used to automatically bypass excess air when increases in duct pressure occur due to closing of zone dampers. Various relief air control settings are accomplished by simple adjustment of the weights on the bypass arm. SC-BH-XX are recommended for systems up to 0.75" WC of static pressure.

Features and Benefits:

- Easy adjustment
- Many sizes available
- Reduces system noise
- Round and rectangular
- Installation flexibility

Warranty: 5 years

Specifications:

Construction	Round: 24-gauge steel shell, aluminum shaft, nylon bushings, blade seals, adjustable weights
Sizes	Round: 7" to 16"
Application	Systems with static pressure 0.02" to 0.75" WC
